Culp, Inc.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements of Culp, Inc. and subsidiary include all adjustments, consisting only of normal, recurring adjustments and accruals, which are, in the opinion of management, necessary for fair presentation of the results of operations and financial position. Results of operations for interim periods may not be indicative of future results. The unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements, which are included in the company's annual report on Form 10-K filed with the Securities and Exchange Commission on July 28, 2000 for the fiscal year ended April 30, 2000.

2. Accounts Receivable

A summary of accounts receivable follows (dollars in thousands):

	October 29, 2000	April 30, 2000
Customers	\$ 66,884	\$ 77,981
Allowance for doubtful accounts	(1,500)	(1,477)
Reserve for returns and allowances	(1,393)	(1,281)
	\$ 63,991	\$ 75,223

3. Inventories

Inventories are carried at the lower of cost or market. Cost is determined for substantially all inventories using the LIFO (last-in, first-out) method.

A summary of inventories follows (dollars in thousands):

	October 29, 2000	April 30, 2000
Raw materials	\$ 43,866	\$ 46,946
Work-in-process	6,865	6,379

Total inventories valued at FIFO cost	80,146	80,323
Adjustments of certain inventories to the LIFO cost method	(893)	(893)
Adjustments of certain inventories to market	(6,286)	(4,959)
	\$ 72,967	\$ 74,471

4. Restricted Investments

Restricted investments were purchased with proceeds from industrial revenue bond issues and are invested pending application of such proceeds to project costs or repayment of the bonds. The investments are stated at cost which approximates market value.

5. Accounts Payable

A summary of accounts payable follows (dollars in thousands):

	October 29, 2000	April 30, 2000
Accounts payable-trade	\$ 25,620	\$ 26,479
Accounts payable-capital expenditures	4,731	10,808
	\$ 30,351	\$ 37,287

6. Accrued Expenses

A summary of accrued expenses follows (dollars in thousands):

	October 29, 2000	April 30, 2000
Compensation and benefits	\$ 14,128	\$ 14,748
Other	8,276	7,360
	\$ 22,404	\$ 22,108

7. Long-Term Debt

A summary of long-term debt follows (dollars in thousands):

	October 29, 2000	April 30, 2000
Senior unsecured notes	\$ 75,000	\$ 75,000
Industrial revenue bonds and other obligations	32,401	32,452
Revolving credit facility	16,000	25,000
Obligations to sellers	3,356	5,034
	126,757	137,486
Less current maturities	(1,678)	(1,678)
	\$ 125,079	\$ 135,808

The senior unsecured notes have a fixed coupon rate of 6.76% and an average remaining term of 8 years. The principal payments become due from March 2006 to March 2010 with interest payable semi-annually.

The company's revolving credit agreement (the "Credit Agreement") provides an unsecured multi-currency revolving credit facility, which expires in April 2002, with a syndicate of banks in the United States. The Credit Agreement provides for a revolving loan commitment of \$88,000,000. The agreement requires payment of a quarterly facility fee in advance. In July 2000, the company amended the Credit Agreement to amend certain covenants. Additionally, the amendment increased the interest rate from LIBOR plus 0.80% to 0.90% to LIBOR plus 1.10% to 1.60%. The specified pricing matrix will be in effect for the remainder of fiscal 2001 and is based on the company's debt to EBITDA ratio, as defined by the agreement. On borrowings outstanding at October 29, 2000, the interest rate was 8.12% (LIBOR plus 1.50%).

The company's \$6,000,000 revolving line of credit expires on November 30, 2001. However, the line of credit will automatically be extended for an additional three-month period on each February 28, May 31, August 31 and November 30 unless the bank notifies the company that the line of credit will not be extended. At October 29, 2000, no borrowings were outstanding under the revolving line of credit.

The industrial revenue bonds (IRBs) are generally due in balloon maturities which occur at various dates from 2006 to 2013. The IRBs are collateralized by letters of credit for the outstanding balance of the IRBs and certain interest payments due thereunder.

The company's loan agreements require, among other things, that the company maintain compliance with certain financial ratios. At October 29, 2000, the company was in compliance with these financial covenants.

At October 29, 2000, the company had two interest rate swap agreements with a bank in order to reduce its exposure to floating interest rates on a portion of its variable rate borrowings. The following table summarizes certain data regarding the interest rate swaps:

notional amount	interest rate	expiration date
\$ 5,000,000	6.9%	June 2002
\$ 5,000,000	6.6%	July 2002

The company could terminate these agreements as of October 29, 2000 and receive approximately \$30,000. Net amounts received/paid under interest rate swap agreements decreased interest expense by approximately \$14,000 for the six months of fiscal 2001 and increased interest expense by approximately \$171,000 for the six months of fiscal 2000. Management believes the risk of incurring losses resulting from the inability of the bank to fulfill its obligation under the interest rate swap agreements to be remote and that any losses incurred would be immaterial.

8. Cash Flow Information

Payments for interest and income taxes during the period were (dollars in thousands):

	2001	2000
Interest	\$ 4,625	\$ 5,197
Income taxes, net of \$29 and \$1,781 in refunds in 2001 and 2000, respectively	69	59

9. Foreign Exchange Forward Contracts

The company generally enters into foreign exchange forward and option contracts as a hedge against its exposure to currency fluctuations on firm commitments to purchase certain machinery and equipment and raw materials. The company had approximately \$1,647,000 of outstanding foreign exchange forward contracts as of October 29, 2000.

10. Net Income (Loss) Per Share

The following tables reconcile the numerators and denominators of net income (loss) per share and net income (loss) per share, assuming dilution for the three and six months ended October 29, 2000 and October 31, 1999:

11. Segment Information

The company's operations are classified into two business segments: upholstery fabrics and mattress ticking. The upholstery fabrics segment principally manufactures and sells woven jacquards and dobbies, wet and heat-transfer prints, and woven and tufted velvets primarily to residential and commercial (contract) furniture manufacturers. The mattress ticking segment principally manufactures and sells woven jacquards, heat-transfer prints and pigment prints to bedding manufacturers.

The company internally manages and reports selling, general and administrative expenses, interest expense, interest income, other expense and income taxes on a total company basis. Thus, profit by business segment represents gross profit. In addition, the company internally manages and reports cash and cash investments, accounts receivable, other current assets, restricted investments, property, plant and equipment, goodwill and other assets on a total company basis. Thus, identifiable assets by business segment represent inventories.

Sales and gross profit for the company's operating segments for the three months ended October 29, 2000 and October 31, 1999 are as follows:

Management's Discussion and Analysis of Financial Condition and Results of Operations

The following analysis of the financial condition and results of operations should be read in conjunction with the Financial Statements and Notes and other exhibits included elsewhere in this report.

Overview

Culp is one of the largest integrated marketers in the world for upholstery fabrics for furniture and is one of the leading global producers of mattress fabrics (or ticking). The company's fabrics are used primarily in the production of residential and commercial upholstered furniture and bedding products, including sofas, recliners, chairs, love seats, sectionals, sofa-beds, office seating and mattress sets. Although Culp markets fabrics at most price levels, the company emphasizes fabrics that have broad appeal in the promotional and popular-priced categories of furniture and bedding.

Culp's worldwide leadership as a marketer of upholstery fabrics and mattress ticking has been achieved through internal expansion and the integration of strategic acquisitions.

The company's operating segments are upholstery fabrics and mattress ticking, with related divisions organized within those segments. In upholstery fabrics, Culp Decorative Fabrics markets jacquard and dobby woven fabrics for residential and commercial furniture. Culp Velvets/Prints markets a broad range of printed and velvet fabrics used primarily for residential and juvenile furniture. Culp Yarn manufactures specialty filling yarn that is used by Culp and also marketed to outside customers. In mattress ticking, Culp Home Fashions markets a broad array of fabrics used by bedding manufacturers.

Three and Six Months ended October 29, 2000 compared with Three and Six Months ended October 31, 1999

Net Sales. Net sales for the second quarter of fiscal 2001 decreased by 14.3% to \$111.0 million. Sales of upholstery fabrics decreased 19.4% to \$83.0 million, and sales of mattress ticking increased 5.6% to \$28.0 million. Net sales for the first six months of fiscal 2001 decreased by \$32.6 million, or 13.3%, compared with the year-earlier period. The company's sales of upholstery fabrics decreased \$36.0 million, or 18.6%, for the first six months compared with the prior year. Conversely, the company's sales of mattress ticking increased \$3.4 million, or 6.5%, for the first six months compared with the prior year. International sales were down 25.9% and 22.4% for the quarter and six months, respectively. The company had expected that results for the second quarter would be down from the year-earlier period but would represent an improvement compared with the first quarter which included sales of \$101.9 million and a loss of \$1.8 million. Key factors influencing the year-to-year comparisons for the second quarter were continued weakness in consumer spending on home furnishings, especially in the promotional price category, and further increases in the relative strength of the dollar, which has significantly affected Culp's sales to customers outside the United States. The decline in sales of upholstery fabrics was offset in part from increased sales by Culp Home Fashions (primarily mattress ticking). Culp's growth in mattress ticking continues to be driven by the introduction of new designs and fabric constructions as well as the advantages of the company's vertical integration.

Sales in the company's third fiscal quarter are typically lower than in the second period due to holidays and scheduled, seasonal plant shutdowns. Based on that historical pattern and current trends, the company believes that it may report a modest loss in the third quarter. At this time, the company expects to close the year on a profitable note in the final quarter, but is uncertain whether the expected improvement in the fourth period will result in a profit for the year as a whole. The trend in results over the remainder of this fiscal year will be determined by a number of factors including the overall trend in consumer spending on home furnishings and the fluctuation of the dollar relative to other currencies.

Gross Profit and Cost of Sales. Gross profit declined 28.8% for the second quarter versus a year ago and decreased as a percentage of net sales from 18.3% to 15.2%. For the first six months, gross profit decreased 29.6% to \$31.1 million and decreased as a percentage of net sales from 18.0% to 14.6%. The decline was due principally to lower sales volume for the period which led to unfavorable cost variances in the company's upholstery fabrics operation. The company has taken steps to lower expenses by consolidating certain operations and reducing personnel, but these actions were not sufficient to offset the impact of the significantly lower sales.

Selling, General and Administrative Expenses. Selling, general and administrative expenses for the second quarter decreased as a percentage of sales from 12.4% to 12.2%. For the first six months, these expenses increased slightly as a percentage of sales to 12.8% versus 12.7% for

the prior year. The dollar amount of these expenses declined 15.9% and 12.2% for the quarter and six months, respectively, reflecting the company's actions to reduce expenses and the fact that a portion of these expenses is variable based on the level of sales. The company did incur severance costs during the second quarter in connection with the actions taken to reduce selling and administrative expenses.

Interest Expense. Interest expense of \$2.3 million and \$4.6 million for the second quarter and first six months, respectively, was down \$0.2 million and \$0.3 million, respectively, from a year ago due to slightly lower average borrowings.

Other Expense. Other expense increased to \$0.6 million and \$1.3 million for the second quarter and first six months of 2001, respectively, versus \$0.4 million and \$1.0 million, respectively, for the year-earlier periods. These increases were principally due to lower investment income on assets related to the nonqualified deferred compensation plan.

Income Taxes. The effective tax rate for the first six months of fiscal 2001 was 33.0%, down slightly from 34.0% for the year-earlier period.

Net Income (Loss) Per Share. Net income per share for the second quarter of fiscal 2001 totaled \$0.03 per share diluted (based on 11,270,000 average shares outstanding during the period) compared with \$0.27 per share diluted (based on 11,868,000 average shares outstanding during the period) a year ago. For the first half, the company reported a net loss of (\$0.13) per share diluted (based on 11,209,000 average shares outstanding during the period) compared with net income of \$0.39 per share diluted (based on 12,044,000 average shares outstanding during the period) in the prior year.

Liquidity and Capital Resources

Liquidity. Cash and cash investments were \$0.7 million as of October 29, 2000, compared with \$0.8 million at October 31, 1999, and \$1.0 million at the end of fiscal 2000. Funded debt (long-term debt, including current maturities, less restricted investments) was \$126.8 million at October 29, 2000, compared with \$134.5 million at October 31, 1999 and \$137.5 million at April 30, 2000. As a percentage of total capital (funded debt plus total stockholders' equity), the company's borrowings amounted to 50.1% at October 29, 2000, compared with 51.7% at October 31, 1999 and April 30, 2000. The company's working capital as of October 29, 2000 was \$94.3 million, compared with \$92.8 million as of October 31, 1999, and \$100.0 million at the close of fiscal 2000.

The company's cash flow from operations was \$21.2 million for the first six months of fiscal 2001, consisting of \$9.4 million from earnings (net loss plus depreciation and amortization) plus \$11.8 million from the decrease in working capital. The decrease in working capital was primarily due to a \$11.2 million decrease in accounts receivable and a \$1.5 million decrease in inventories offset by a \$0.9 million decrease in accounts payable and a \$0.7 million increase in other current assets.

In separate authorizations in June 1998, March 1999, September 1999 and December 1999, the board of directors of the company authorized the use of a total of \$20.0 million to repurchase the company's common stock. Over the past two fiscal years, the company has invested \$12.2 million to repurchase a total of 1.8 million shares. No purchases were made during the first six months of fiscal 2001 under these authorizations.

Financing Arrangements. Culp has outstanding \$75 million of senior unsecured notes with a fixed coupon rate of 6.76% and an average remaining term of eight years.

Culp has an \$88 million syndicated, unsecured, multi-currency revolving credit facility. The facility, which expires in April 2002, requires quarterly payments of interest on all outstanding borrowings and a quarterly facility fee paid in advance. In July 2000, the company amended the credit facility to amend certain covenants. The amendment also increased the interest rate from LIBOR plus 0.80% to 0.90% to LIBOR plus 1.10% to 1.60%. The specified pricing matrix will be in effect for the remainder of fiscal 2001 and is based on the company's debt to EBITDA ratio, as defined by the facility. As of October 29, 2000, the company had outstanding balances of \$16 million under the credit facility.

The company also has a total of \$32.4 million in currently outstanding industrial revenue bonds ("IRBs") which have been used to finance capital expenditures. The IRBs are collateralized by letters of credit for the outstanding balance of the IRBs and certain interest payments due thereunder.

The company's loan agreements require, among other things, that the company maintain compliance with certain financial ratios. As of October 29, 2000, the company was in compliance with these financial covenants.

As of October 29, 2000, the company had two interest rate swap agreements to reduce its exposure to floating interest rates on a \$10 million notional amount. The effect of these contracts is to "fix" the interest rate payable on \$10 million of the company's variable rate borrowings at a weighted average rate of 6.8%. The company also enters

into foreign exchange forward and option contracts to hedge against currency fluctuations with respect to firm commitments to purchase certain machinery, equipment and raw materials. The company had approximately \$1.6 million of outstanding foreign exchange forward contracts as of October 29, 2000.

Capital Expenditures. The company maintains an ongoing program of capital expenditures designed to increase capacity as needed, enhance manufacturing efficiencies through modernization and increase the company's vertical integration. Capital expenditures for the first six months of fiscal 2001 totaled \$3.7 million compared with \$10.5 million in the year-earlier period. The company plans for total capital spending for fiscal 2001 to be approximately \$16 million.

The company believes that cash flows from operations and funds available under existing credit facilities will be sufficient to fund capital expenditures and working capital requirements for the foreseeable future.

Inflation

The cost of certain of the company's raw materials, principally fibers from petroleum derivatives, has increased somewhat; but overall operating expenses are remaining generally stable. Factors that reasonably can be expected to influence margins in the future include changes in raw material prices, trends in other operating costs and overall competitive conditions.

Seasonality

The company's business is slightly seasonal, with relatively stronger sales during the second and fourth fiscal quarters. This seasonality results from one-week closings of the company's manufacturing facilities, and the facilities of most of its customers in the United States, during the first and third quarters for the holiday weeks including July 4th and Christmas.

Forward-Looking Information

The company's quarterly report on Form 10-Q contains statements that may be deemed "forward-looking statements" within the meaning of the federal securities laws, including the Private Securities Litigation Reform Act of 1995. Such statements are inherently subject to risks and uncertainties. Forward-looking statements are statements that include projections, expectations or beliefs about future events or results or otherwise are not statements of historical fact. Such statements are often characterized by qualifying words such as "expect," "believe," "estimate," "plan," and "project" and their derivatives. Factors that could influence the matters discussed in such statements include the level of housing starts and sales of existing homes, consumer confidence, trends in disposable income and general economic conditions. Decreases in these economic indicators could have a negative effect on the company's business and prospects. Likewise, increases in interest rates, particularly home mortgage rates, and increases in consumer debt or the general rate of inflation, could affect the company adversely. Because of the significant percentage of the company's sales derived from international shipments, strengthening of the U.S. dollar against other currencies could make the company's products less competitive on the basis of price in markets outside the United States. Additionally, economic and political instability in international areas could affect the demand for the company's products.

New Accounting Pronouncements

In June 1998, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (SFAS) No. 133, "Accounting for Derivative Instruments and Hedging Activities." As amended, this new standard is effective for fiscal years beginning after June 15, 2000, which will be effective for the company's fiscal year 2002. This statement establishes accounting and reporting standards for derivative instruments, including certain derivative instruments embedded in other contracts, and for hedging activities. The company has not determined the financial impact of adopting this SFAS and has not determined if it will adopt its provisions prior to its effective date.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The company is exposed to market risk from changes in interest rates on debt and foreign currency exchange rates. The company's market risk sensitive instruments are not entered into for trading purposes. The company has not experienced any significant changes in market risk since October 29, 2000.

The company's exposure to interest rate risk consists of floating rate debt based on the London Interbank Offered Rate plus an adjustable margin under the company's revolving credit agreement and variable rate debt in connection with the industrial revenue bonds. To lower or limit overall borrowing costs, the company enters into interest rate swap agreements to modify the interest characteristics of portions of its outstanding debt. The agreements entitle the company to receive or pay to the counterparty (a major bank), on a quarterly basis, the amounts, if any, by which the company's interest payments covered by swap

agreements differ from those of the counterparty. These amounts are recorded as adjustments to interest expense. The fair value of the swap agreements and changes in fair value resulting from changes in market interest rates are not recognized in the consolidated financial statements. The annual impact on the company's results of operations of a 100 basis point interest rate increase on the October 29, 2000 outstanding balance of the variable rate debt would be approximately \$470,000 irrespective of any swaps associated with this debt.

The company's exposure to fluctuations in foreign currency exchange rates is due primarily to a foreign subsidiary domiciled in Canada and purchases of certain machinery, equipment and raw materials in foreign currencies. The company's Canadian subsidiary uses the United States dollar as its functional currency. The company generally does not use financial derivative instruments to hedge foreign currency exchange rate risks associated with the Canadian subsidiary. However, the company generally enters into foreign exchange forward and option contracts as a hedge against its exposure to currency fluctuations on firm commitments to purchase certain machinery, equipment and raw materials. The Canadian subsidiary is not material to the company's consolidated results of operations; therefore, a 10% change in the exchange rate at October 29, 2000 would not have a significant impact on the company's results of operations or financial position. In addition, the company had approximately \$1.6 million of outstanding foreign exchange forward contracts as of October 29, 2000. As a result, any change in exchange rates would not have a significant impact on the company's results of operations or financial position as the foreign exchange forward contracts have "fixed" the exchange rate with respect to these purchase commitments.

Part II - OTHER INFORMATION
